

## Fund Update for the Generate KiwiSaver Scheme: Growth Fund

31 March 2020

This fund update was first made publicly available on 1 May 2020.

### What is the purpose of this update?

This document tells you how the Growth Fund has performed and what fees were charged. The document will help you to compare the fund with other funds. Generate Investment Management Ltd prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

### Description of this fund

The objective of the Growth Fund is to provide a growth investment return over the long-term through investment in a portfolio of actively managed cash, fixed interest, property (including aged care) and infrastructure assets<sup>1</sup>, Australasian equities and international equities<sup>2</sup>. The fund has a medium to high level of volatility.

	Growth Fund
Total value of the fund	\$574,623,967
Number of investors in the fund	39,503
The date the fund started	16 April 2013

### What are the risks of investing?

#### Risk indicator for the Growth Fund:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way. To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at <https://www.generatewealth.co.nz/survey>. Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the last five years. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the product disclosure statement (PDS) for more information about the risks associated with investing in this fund.

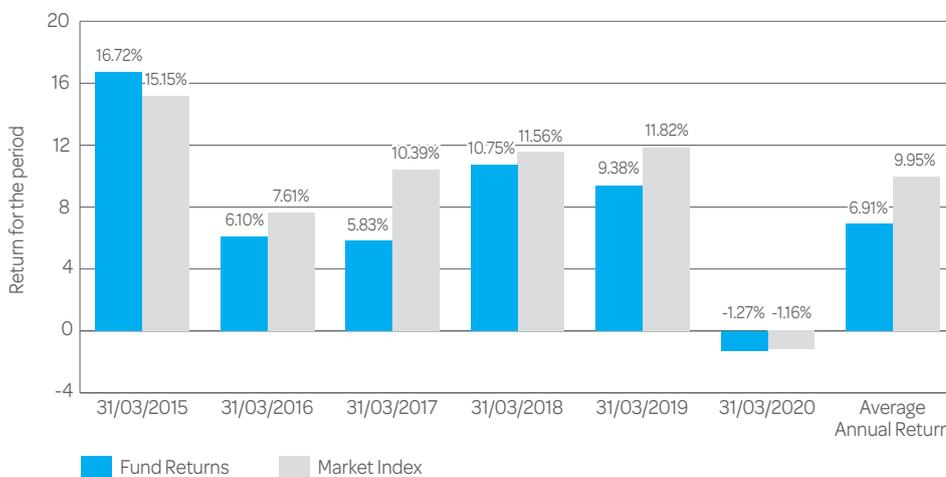

## How has the fund performed?

	5 year p.a.	Past year
Annual return (after deductions for charges and tax)	6.07%	-1.27%
Annual return (after deductions for charges but before tax)	6.97%	-1.21%
Market index annual return (reflects no deduction for charges and tax)	7.93%	-1.16%

The market index return reflects a composite of benchmark index returns, weighted for the fund's target asset allocation, being the fund's relevant benchmark since inception. All of the share market benchmark indices used include dividends but do not include imputation credits.

Additional information about the market index is available in the SIPO on the register at [business.govt.nz/disclose](http://business.govt.nz/disclose).

## Annual return graph

This shows the return after fund charges and tax for each year ending 31 March since the fund started. The last bar shows the average annual return since the fund started, up to 31 March 2020.

**Important:** This does not tell you how the fund will perform in the future. Returns in this graph are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower. Benchmark returns in the graph are before the deduction of tax.

## What fees are investors charged?

Investors in the Growth Fund are charged fund charges. In the year to 31 March 2020 these were:

	% of net asset value
<b>Total fund charges</b>	1.45%
Which are made up of:	
Total management and administration charges including:	
Manager's basic fee	1.00%
Other management and administration charges <sup>3</sup>	0.45%
Total performance based fees	0.00%
<b>Other charges</b>	\$ amount per investor
Membership Fee <sup>4</sup>	\$36.00 per year

A portion of the 'other management and administration charges' relate to management, performance and administration charges from investments in underlying funds. Some of these calculations are based on estimates.

Investors are not currently charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the PDS for more information about fees.

Small differences in fees and charges can have a big impact on your investment over the long term.

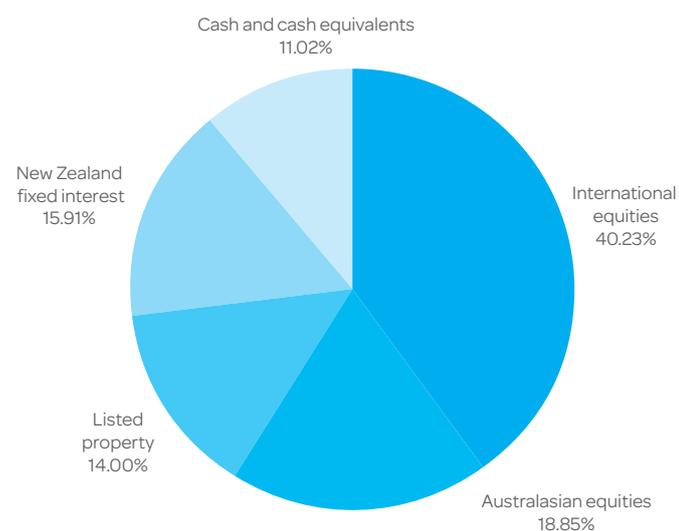

## Example of how this applies to an investor

Hannah had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Hannah incurred a loss after fund charges were deducted of -\$127 (that is -1.27% of her initial \$10,000). Hannah also paid \$36 in other charges. This gives Hannah a total loss after tax of -\$163 for the year.

## What does the fund invest in?

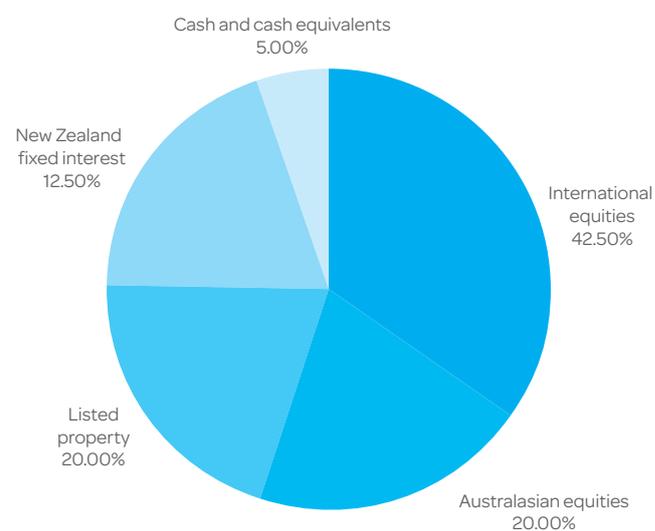

This shows the types of assets that the fund invests in.<sup>1,2,5,6</sup>

### Actual investment mix

### Target investment mix

This shows the mix of assets that the fund generally intends to invest in.

### Top 10 investments

## Further information

You can also obtain this information, the PDS for the Generate KiwiSaver Scheme, and some additional information from the offer register at [business.govt.nz/disclose](http://business.govt.nz/disclose).

## Notes

1. The Manager takes a broad view of what constitutes infrastructure assets. See the SIPO for further information.
2. International equities are predominantly investments in underlying funds. They also include an investment in Berkshire Hathaway Inc. and investments in other large capitalisation international stocks.
3. For some of the underlying funds that the fund invests into estimates were used when deriving annual management fees, performance-based fees and operating costs. The management fee estimate is calculated by either (i) the annual management fees as a percentage of average NAV from the most recent period whereby the information is available or (ii) the sum of the fund's monthly average investments in the underlying funds concerned, multiplied by the underlying funds' percentage annual management fees. Where otherwise not available the performance fees were calculated using the same performance criteria as that stated by the administrators of the underlying funds and applied to FY19 performance. Performance-based fees are subject to market movements and external manager performance and therefore are likely to differ from period to period. The operating costs for the relevant period for some of the underlying funds were not available. In these instances the operating costs estimate is calculated by either (i) the operating costs as a percentage of average NAV from the most recent period whereby the information is available or (ii) the estimate is the sum of the fund's monthly average investments in the underlying funds concerned, multiplied by the underlying funds' percentage annual operating costs.
4. Membership fees are the monthly fixed dollar charges for membership in the Generate KiwiSaver Scheme. You will pay only \$3 each month even if you are invested in multiple funds within the Generate KiwiSaver Scheme.
5. 'Cash and cash equivalents' includes the value of foreign exchange hedging derivatives related to the fund's off-shore investments.
6. Listed Property includes investments in aged care companies.
